Oath/Declaration

1. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

2. The oath or declaration filed on 3-22-2004 is defective because:

It does not identify the citizenship of inventors: Dominic Ricciardi, James Ibezim, and Martin C. Dolly (pages 2 and 6-7 of the oath).

Applicants have not given a post office address anywhere in the application papers (pages 2-7 of the oath) as required by 37 CFR 1.33(a), which was in effect at the time of filing of the oath or declaration. A statement over applicant's signature providing a complete post office address is required.

Allowable Subject Matter

3. The following is a statement of reasons for the indication of allowable subject matter: upon close review of the claims, the prior art, and applicant's remarks in the Amendment filed on 2-9-2009, it appears that the allowance of claim 15 is appropriate.

The prior art of U.S. Pat. No. 7,180,912 by Samarasinghe discloses a method for providing multi-media services (i.e. third party call control; col. 5, lines 37-51) between at least two Session Initiation Protocol (SIP)-enabled communication devices (i.e. telephones) (Fig. 1, Fig. 2: 22a, 22b; col. 7, lines 23-29) in an IP-based portion of a multi-media provider system (Fig. 2, 10a), the system providing a direct multi-media interface with the devices (Fig. 3; col. 9, line 37 – col. 13, line 51) rather than providing a multi-media service (i.e. post answer call redirection (PACR)) to a telephone call established in a circuit switch network without accessing

a circuit switch, circuit service control point (SCP), or circuit adjunct. Therefore, Samarasinghe does not meet the requirements of the claimed invention.

Further, it would be contrary to the teaching in Samarasinghe to include receiving at a Border Element instructions for PACR from an Application Server; providing PACR without accessing a circuit switch, circuit SCP, or circuit adjunct; and after receiving PACR, routing a re-directed telephone call originally established in a circuit switch network in an IP-based portion of a multi-media provider system without accessing the circuit switch, the circuit SCP, and the circuit adjunct since Samarasinghe discloses providing multi-media services to SIP-enabled communication devices using a direct multi-media interface with communication devices.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892 Form.
